

Stovebolt Image Uploading

2 Nov 2018

Step One

- Open a "New Reply" or "New Thread" box.
- Look for the "Attachment Manager" link.
- Click on it.

Step Two

Once the Attachment Manager opens:

- Either browse for your images or drag and drop. The attachment manager will only do one at a time.
- If your images are larger than 5MB, they won't be accepted (see next step) and you'll need to resize them.
- Click "done" once you've finished selecting images.

Not Working?

If you get the "File is too big" error:

- Your image is larger than 5MB. Resize it smaller.
- Attachments aren't allowed in that particular forum (Look at the example -- "Max file size is 0 MB" means attachments aren't allowed in that forum). We only allow attachments in the technical discussions.
- For other issues, please ask in the "IT/Short Bus" forum.
